The IRISH

Comes Commercii.

TRADER'S-COMPANION.

CONTAINING

I. Exact and Ufeful Tables, shewing the Value of any Quantity of Goods or Wares ready cast up, more adapted to Merchants Use, than any other extant. Calculated by EDWARD HATTON, Gent. And Carefully Corrected by NICHOLAS GRANT, Philomath.

II. Tables of Exchange, In two Parts. Part First, English Money Exchanged into Irifb, for any Number of Pounds, Shillings, and Pence, from Three Handred Pounds to one Penny, and at all the most usual Rates, whether Quarters or Eighths, from Five per Cent. to Eleven per Gent. Part Second, In Money Exchanged into English, for the same Number of Pounds, Shillings, and Perce, and at the fame Rates. Each by Addition only.

III. An Index to INTEREST. Containing Tables of Simple Interest, at 5, 6, and 7 per Cent. from I Day to 30 Days, and for 40, 50, 60, 70; 80, 90 Days, and I Year. By E. HATTON, Gent. Together with Tables of Interest at the fame Rates, for 3, 6, and 9 Months.

To all which is prefixed, The New Table of Corn, as the same was made current by the LORDS JUSTICES Proclamation, from the 10th Day of September, 1737.

The Tables of E-change and Coin Calculated, and Tables of Interest Corrected By JOHN WATSON, Bookfeller.

DUBLIN:

Printed by R. REILLY,

THE London Copy of the First Part of this Book was carefully examined before we put it to the Press, and a great Number of Mistakes rectified all along; but as Errors in a Work of this Kind are almost unavoidable, we have had each Sheet when printed off carefully revised, and find the under Errata are the only Mistakes, which every Perfon that buys it may mend with his Pen, if not already done to his Hand.

The USE of the foregoing TABLE.

HE Table foregoing is so plain, that it needs no Explanation; the Epistle to the Reader shews what is needful relating thereto, and some Examples of its Use take as follow, viz.

Example 1.] Admit you would know what 47 Pounds, Ells, Yards, or Ounces, &c. of any Commodity amounts to, at 7s. 9d. the Pound, Ell, &c. Look first for the Price of the Thing proposed, as here 7s. 9d. at the Top of the Table; then cast your Eye downward, and under the Words [The Value of] you will find 47, right against which, toward the right hand, you will find 18l. 4s. 3d. and so much is the true Value of 47 Pounds, Ells, Yards, &c. of any thing, at 7s. 9d. per Pound, Ell, Yard, &c.

Example 2.] Admit you would know the Value of some Number of Pounds, Ells, or any other Thing, which cannot be sound at once in the Table; as suppose you would know what 751 Ells of Linen, &c. amounts to at 75. 9d. per Ell: The Rule is, having sound (as before) the Price of the Ell at the Top of the Table, you will find under [The Value of] 700, right against which, toward the right hand, you have the Value of 700 Ells,

Examp. 3.] Admit the Value of the Unit of your Commodity or Merchandize is not just expressed in the Table, (tho' I think there is scarce any Thing bought and sold, whose Value is not therein;) as suppose you would know the

7

th

The Use of the foregoing Table. the Value of 56 Yards of Broad Cloth, at 125. 5d. the Yard: Look for 125. the Price of the Pound, Ell, Yard, Ounce, or other Thing, 1. s. d. and against 56 you have - 33: 12:0 And under 5d. and a- ? gainst 56 you have-The Sum of which for ? 34:15:4 Answer is -Examp. 4.] Admit you would find the Value of 7. C. 3 q. 25 lb. of any Commodity at any Rate; as suppose at 7s. 9d. per Pound, here you will find the Value of 1 Hundred, viz. 112 lb. at 7s. 9d. to be - 43: 8:0 The Value of 3q. (or 84 lb.) at 7s. 9d. is 32:11:0And the Value of the 9:13:9 25 lb. is (at that rate) The Sum for Answer is 346: 0:9 Examp. 5.] The farther Use of this Table is to find the Value of the Hundred Weight of any Thing, by knowing the Price of the Pound. Thus, if the Price of a Pound Weight is 7s. 9d. that of the Hundred (against 1121b. and under 7s. 9d.) will be found 431. 8s. and fo of any other. Or where the Value of the Pound is low. (as 6d. or less) the Value of the Hundred may be found by Memory, by this short Verse; As many Farthings as will buy a Pound, So oft (in th' Hundred Weight) is Two and Four-Pence found. Thus, if the Value of the Pound is 3 d. Farthing, that is, 13 Farthings, that of the Hundred is 13 two Shillings, and

13 Groats, which is 30s. 4d. the Hundred; and the reason of this is, because

112 Farthings is 25. 4d.

W

you

add

of the

chan-

l'able,

Thing is not

know

158 The Use of the foregoing Table.

Examp. 6.] By the foregoing Table you may likewise find the Value of the Pound (to a Farthing) by knowing the Value of the Hundred Weight: Thus, if the Value of the Hundred is 16s. 4d. (or a Number next thereto) against 112 included thus in a Parenthess [112] and casting your Eye to the Top of that Column, you will find the Price of the Pound, &c. to be 1d. 3 Farthings.

Examp. 7.] The farther Use of this Table is to find how much of any Commodity at a Rate proposed, any Sum of Money will buy. Thus, if you would know how many Yards of Mussin of 6s. 3d. per Yard, 25l. will purchase: Look at the Top of the Table for 6s. 3d. and under that Rate look for 25l. in the Column of Pounds, Shillings, and Pence, and you have 80 in the Column towards the left hand, under [The Value of] and so many

Yards will the 25%. buy.

Examp. 8.] Or if you defire to know what any Sum will buy that is not just mentioned in the Table; as suppose you would know how many Ells of Holland of 6s. 3d. per Ell 100l. will buy: Look under 6s. 3d. for 100, as you did before for 25 l. and you will find against 93l. 15s. (which is the next Number less than the 100l.) 300, then deduct 93l. 15s. from 100, and the Remainder is 6l. 5s. against which (or the Number next less) you will find in the Table under the rate 6s. 3d. aforesaid 20; so that 100l. I find will buy Ells 320, at 6s. 3d. each; and thus

1. s. Ells. may you find any
93: 15 will buy 300 other to $\frac{1}{3}$, or a
6: 5—20 Quarter of a Unit thereof. See
100: 0—320 the Margent.

This

The Use of the foregoing Table. 159

This Table reduceth any Number of Shillings, Pence or Farthings into Pounds, which is very useful to all Persons, especially such as understand not Division.

Examp. 9.] To reduce Farthings in-

to Pounds.

In 75643 Farthings, how many Pounds Sterling? Under 1 Farthing,

Against 70000 is — 72:18: 4

5000 — 5: 4: 2

600 — 0:12: 6

43 — 0: 0: $10\frac{3}{4}$ 75643 — 78: 15: $10\frac{3}{4}$

Examp. 10.] To reduce Pence into

Pounds.

In 31839 Pence, how many Pounds? Under 1 d. against 30000 is 125:0:0

1000—4:3:4 800—3:6:8 39—0:3:3

Answer 31839-132:13:3

Examp. 11.] To reduce Shillings into Pounds.

Look for your Number of Shillings given to be reduced, under the Price [One Shilling] and right against the Shillings given, you have the Answer in Pounds, as before. This needs no Example.

Examp. 12.] From what hath been shewed hitherto, this Table will be found very useful for the speedy working Questions in Barter: As if a Merchant hath CottonWool, 8 C. 3 q. 27 lb. at 13 d. perPound, which he is willing to barter with a Linen-Draper for Fustians, viz. died Jeans at 14s. each End, white Jeans of 16s. per End, and Barmillians at 18s. per End; how many Ends of Fustian must the Draper give the Merchant for his Cotton Wool? Answer, 24 Ends of each Sort, and 1s. 10 d. in Money. See the Work.

160 The Use of the foregoing Table. At 133d. the Pound 1 C. (or 112 lb.) 1. s. d. is worth — 6:8:4 Multiply The Value of 8 C. is __ } 51 : 6 : 8 3 Quarters -- 4:16: 3 27 lb. is- 1:10:11 1 So the Cotton 7 Woolis worth \ 57: 13: 10 1 Now if the feveral prices of the Fustians is added together, the Sum is 48s. 3 of which is 16s. under which Price, and against 571. 125. (which is the next Number to 571. 135. 101d.) you have 72, \(\frac{1}{3}\) of which is 24, which shews that the Draper must give the Merchant 24 Ends of each Sort of Fustians for his Cotton Wool. Examp. 13.] This Table is also useful in working Questions in Loss and Gain: As if a Merchant buyeth 849 Bundles of Yarn at 6s. 9d. per Bundle, and fells the same again at 9s. 6d. per Bundle, what does he gain thereby? The Difference in the Prices is 25. 9d. and 849 times two Shillings and nine Pence by the Table is 116%. 14s. 9d. for Answer. For 800 under 2s.9d. is 110: 0:0 49 —— is 6:14:0 TheSum849 Answer - 116:14:9 . Examp. 14] When the Price of the Unit of any Commodity is any Sum above 1 1. and under 21. the Value is found by the Table; thus, if you would find the Value of 84 died Jeans, &c. at 34s. 6d. per End. 1. s. d. For the 11. put down ____ 84: 0:0 Then look for 14s. 6d. at the top of the Ta-60:18:0 ble, and against 84 you will find -The Sum of which is \ 144:18:0 The

The SECOND EDITION.

DUBLIN: Printed in the Year 1738,

Mr. JAMES SWIFT, MERCHANT

IN

Eustace-Street, DUBLIN.

SIR,

in their Manuscript Copy, submitted entirely to your Judgment of them, which, after some Perusal, You were pleased to give very favourably, and with a great Deal of Good Nature.

I beg Leave, SIR, now they are again printed, humbly to present them to You, as a publick, and, I hope, lasting Acknowledgment of the great Favour you did me, in recommending the first Edition so generously to the World, and also in obtaining for me the Recommendation of the rest of the Bankers, and of several eminent Merchants in Dublin.

I am, with the greatest Respect, SIR, Your most Obliged, and most Faithful, Humble Servant,

JOHN WATSON.

EXPLANATION.

HE Method of using these Tables is this. Suppose I wanted to Exchange 751. 10 s. 6 d. English Money into Irish, at 3 and 3 Quarters per Cent. I turn over the Book in the First Part, where the Running Title is English Money Exchanged into Irish, till I come to the Page where Exchange at 8 and 3 Quarters is in the Second Line: And there I find that

	1.	s.	d.	9.
701. is	76			
51. is	5	8	9	0
10.5. is	0.	IO	IO	2
6 d. is	0	0	6	2

The Answer is 1.82 2 8 6

Or any Sum of Irish Money may be Exchanged into English by turning to the Second Part after the same Manner.

Only Observe, that wherever this Mark is prefixed to any Sum, there is no Manner of Fraction in the Exchange thereof.

But in every other Line, through these Tables of Exchange, there is understood to be wanting Some Part or Fraction of a Farthing, perhaps half a Farthing, or less than half a Farthing, or it may chance to be very near a Farthing.

And therefore, there must be some Allowance made for the Fractions that are wanting, in taking out the Exchange of any Sum, where there are 3 or 4 such Lines.

Example. I have 541. 12 s 6 d. Irish, to be Exchanged into English Money, at 9 and a Quarter.

	1.	s.	d.	9.
501. is	45	15	3	3
41. is		13		
125. 18	. 0	10	II	3
6 d. is	0	0	5	1

The Answer is 1. 49 19 11 1

But, because in every one of these Lines there is a Fraction wanting, which I know by Inspection, none of them having any such Mark: Therefore, in the 4 Lines, I might have lost very near 4 Farthings, but not quite so much. As it happens, there are in this Example three Farthings lost, for the true Answer is 501. English.

But the Difference in any Example will

ever amount to Two Pence.
